

MAINTENANCE TIPS

Big and small drum headers

You will find a detailed documentation of the items from our maintenance check in our service video. You can find this under www.kemper-stadtlohn.de or scan the QR-Code.

| Description | Status | | | Remarks |
|---|--------|---|---|---------|
| | + | 0 | - | |
| Check the condition of the cleaners on all drums; turn or replace if necessary | | | | |
| Check the wear condition of the tines on the gathering drums, if necessary, use weld on points on the bottom row of tines | | | | |
| Check blades, replace if necessary | | | | |
| Check cleaners on blade rotor for wear, damage or missing parts, replace if necessary | | | | |
| Check setting of scrapers | | | | |
| Check if material has accumulated between the cover and the scraper of the feeding drum | | | | |
| Check sliding sleeve hexagonal shaft | | | | |
| Maintain the main drive friction clutch and check the condition of the discs | | | | |

STATUS: + = good 0 = usable - = repair / replace

For the safe operation of your Kemper header, refer to the Operator's Manual
