

KEITH

490^{plus}
Full force ahead

The versatile rotary crop header especially for difficult harvesting conditions

- New: 12-row header with 6 equally sized gatherer drums
- Developed and designed for greatest throughput
- Wide and lightweight
- Direct crop feed
- Low outer pointers ensure perfect pick-up of down crop
- All ratchet clutches for the intake drums integrated in the oil bath gearbox
- Easy maintenance, few lubrication points
- All scrapers are bolt-on and can be used on both sides

The multi speed gearbox offers more header speeds for various lengths of cut. The 4 speeds assure an optimised smooth crop flow. The integrated quick coupler makes it easy to attach and detach the header.

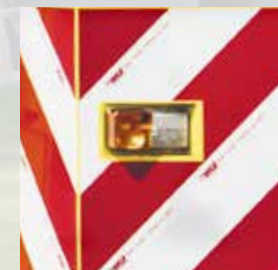

If you don't want to waste time...

... ready in 30 sec

- Rapid change from one field to the next, no need to leave the cab
- No time-consuming fitting of safety equipment and lighting
- All necessary safety equipment integrated. No loss of protective covers. No damage to safety equipment left at the edge of the field
- High driving comfort due to long wheel base
- Large 360° turning transport wheel
- Unrestricted access to the chopping unit
- Integrated electric coupling for lighting
- High road safety

Always on the safe side

Technical data of the 490^{plus}

Dimensions	Operating width (m)	9
	Transport width (m)	3
	Overall width (m)	9.02
	Length (m)	2.70
	Height (m)	1.98
Cutting system	Rotating knives	•
Other	Rows (75cm)	12
	Weight (kg)	4150
Gearbox	Oil bath gearboxes with safety clutches	•

- Rapid double folding for quick field change and good visibility
- Safe folding also on slopes due to low centre of gravity
